

Department Of Genetics, Leeds University, UK

SERVICES – Full MEP Services

Project description

Project: Department of Genetics, Garstang & Astbury Buildings

Andrew Smith was responsible for the MEP design and delivery of the state of the art Research Laboratories at the University Of Leeds.

The Departments were entirely refurbished within a working built environment which created many logistic problems. The design included six new “Culture” Close Control Units, eight high hazard Fume Cupboards and medical gases and hazardous waste.
