

## REEL CINEMAS, DUBAI MALL

DUBAI, UAE

FC CONSULT were appointed as Building Services Engineers on this `flagship Cinema expansion for EMAAR Leisure & Entertainment (REEL Cinemas). This was an extremely difficult refurbishment due to the extensive alterations within the Mall/Existing Cinema where both had to be kept fully operational.

Working closely with the Dubai Civil Defence and the Mall Stakeholders, Design Team and Contractor, we ensured the impact to operations was minimal.

On completion this will be the largest and most sophisticated Cinema in the Middle East and North Africa.

The Fire & Life Safety Strategy of such a re-development of the existing Cinema was extremely difficult yet the team managed to overcome all the issues uncovered with the original base build. The available Power also created challenges which have also been mitigated.

The self service and ticketing systems developed for REEL Cinema have been ground breaking and the Customer experience has certainly been overwhelming.

It has been a privilege to be involved with such an amazing project. The journey still continue today with further works and expansion plans.
